

HPTN 071 (PopART)

Cross-Disciplinary Approaches to Understand Successes and Challenges of Implementing a Community-Wide Universal Test and Treat Programme in Sub-Saharan Africa

Organizer: HIV Prevention Trials Network (HPTN)

Location: Havana Amphitheater

Date & Time: Wednesday 26, July 07:00 - 08:30

Chairs: David Serwadda, Makerere University School of Public Health, Uganda
Alasdair Reid, UNAIDS, Switzerland

Session Code: WESA01

Breakfast will be served

HPTN
HIV Prevention
Trials Network

SESSION PRESENTATIONS:

Whilst significant advances have been made towards the aspirational 90:90:90 targets set by UNAIDS, it is crucially important to understand where the gaps lie, what the challenges are in filling those gaps, and the successful approaches that can be used to address those challenges. This understanding will help guide programmes as they seek to get closer to the targets and bring the global HIV epidemic under control.

- **Have We Reached the 90-90-90 Targets After Two Years of the PopART Intervention?**

Richard Hayes, London School of Hygiene & Tropical Medicine, United Kingdom

- **Getting to the Second 90 in Adolescent HIV: What is Needed?**

Kwame Shanaube, ZAMBART Project, Zambia

- **Understanding Time Needed to Link to Care and Start ART**

Janet Seeley, London School of Hygiene and Tropical Medicine, United Kingdom

- **HIV-Related Stigma in the Context of UTT: Parallel Analysis of Data from PLWH, Community Members and Health Workers**

James Hargreaves, London School of Hygiene and Tropical Medicine, United Kingdom

- **The Community HIV Care Provider (CHiP) Service: How Much Does It Cost? - Katharina Hauck**

Katharina Hauck, Imperial College London, United Kingdom

- **Modelling Potential Effects of the Intervention: Every Individual Matters - Will Probert**

Will Probert, University of Oxford, United Kingdom

HPTN 071 (PopART) is a community-based, randomized study evaluating the impact of a combination HIV prevention package on HIV incidence. This study is the largest community-randomized trial – total estimated population 1 million – testing the universal HIV test and treat strategy and is being conducted across 21 high HIV burden, resource-limited urban settings in the Western Cape of South Africa and Zambia.

**International Initiative
for Impact Evaluation**
